WARNING

- Before starting and operating: Know the operating and safety instructions in the operators manual and on the tractor Clear the area of bystanders. Locate and know operation of controls. Fasten your seat belt.
- Start engine only from operators seat with transmission in neutral, PTO disengaged and hydraulic controls in lowered position.
- Avoid accidental contact with gear shift lever while the engine is running. Unexpected tractor movement can result.
- Slow down on turns, rough ground and slopes to avoid upset.
- Do not permit anyone but the operator to ride on the tractor. There is no safe place for riders.
- Lock brakes together, use warning lights and SMV emblem while driving on roads.
- Lower equipment, place gear shift levers in neutral, stop engine and apply parking brake before leaving tractor seat.
- Always engage parking brake before dismounting. Transmission will not prevent tractor from rolling when engine is shut off.
- Keep safety shields in place for your protection.

FAILURE TO FOLLOW ANY OF THE INSTRUCTION ABOVE CAN CAUSE SERIOUS INJURY TO THE OPERATOR OR OTHER PERSONS.

ATTENTION

- Do not tow tractor unless all transmission levers are in neutral.
- To prevent cab damage: Place tractor hydraulic system in position control before attaching implement. Raise the implement slowly and ensure 4" (10cm) cab to implement clearance.
- To protect the engine and hydraulic components: 1) Idle engine for one minute before shutdown after full load operation. 2) Do not exceed half throttle for first five minutes of operation.
- Do not use creeper gears for high draft loads.
- With units equipped with creeper gears. Do not stop engine with transmission in "creeper gear" to avoid starting difficulties.

See Operators Manual for complete instructions.
